1. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose the said receive signal includes a sequence of samples, including a last sample, each of said samples having a magnitude, and wherein said step of defining a maximum signal profile includes setting the magnitude of said maximum signal profile equal to the magnitude of said last sample and, moving backwards in the sequence, comparing the magnitude of said maximum signal profile to the magnitude of each of said samples and setting said maximum signal profile to the magnitude of one of said samples if the magnitude of said one of said samples is greater than the magnitude of said maximum signal profile, thereby tracking the upper envelope of said receive signal as recited in independent claims 1 and 6.

The prior art also does not disclose setting the magnitude of said minimum signal profile equal to the magnitude of said first sample and, moving forwards in the sequence, comparing the magnitude of said minimum signal profile to the magnitude of each of said samples and setting said minimum signal profile to the magnitude of one of said samples if the magnitude of said one of said samples is less than the magnitude of said minimum signal profile, thereby tracking the lower envelope of said receive signal as recited in independent claims 11 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
